

MEMORY AND DISK MANAGEMENT

AIMMA BUTT

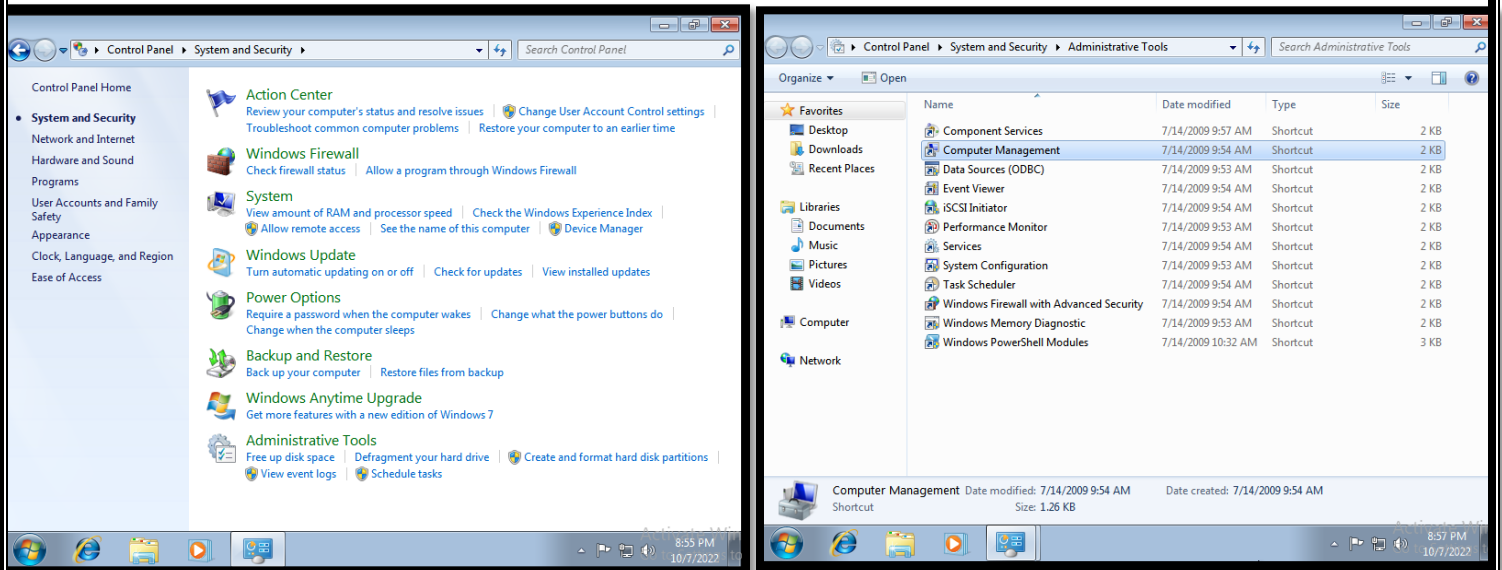

- Step 1: Welcome to Windows 7.

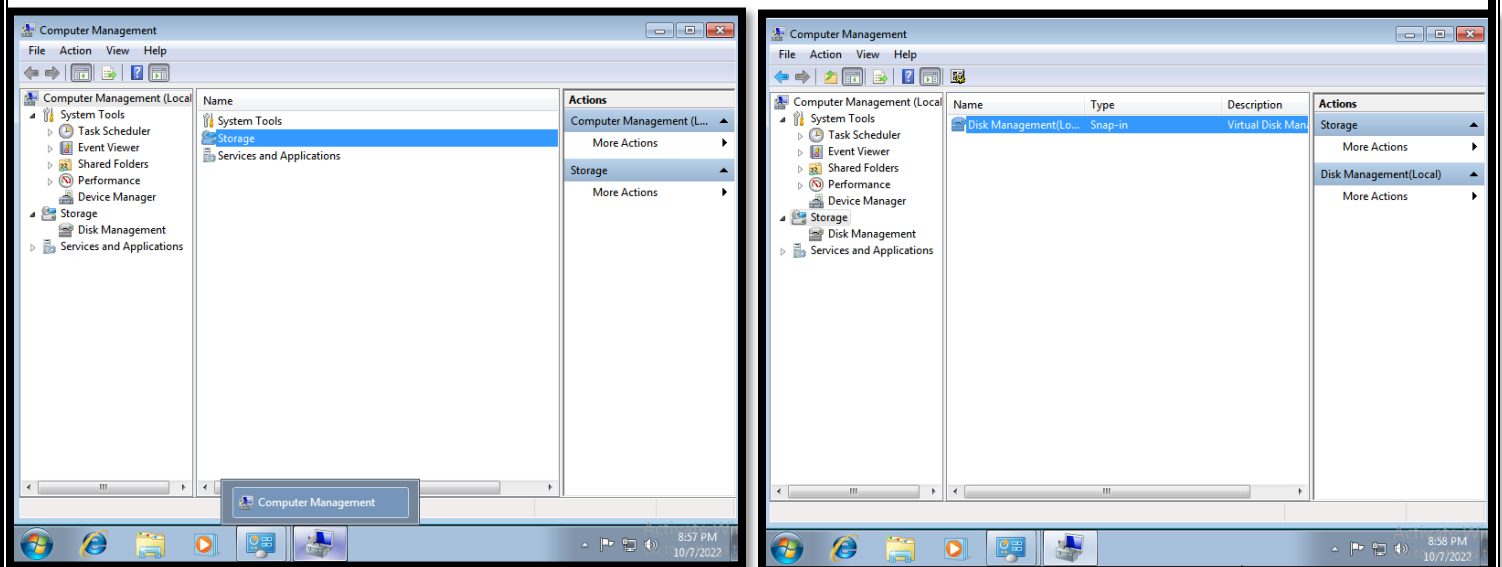

- Step 2: Go to Control Panel and then to System and Security

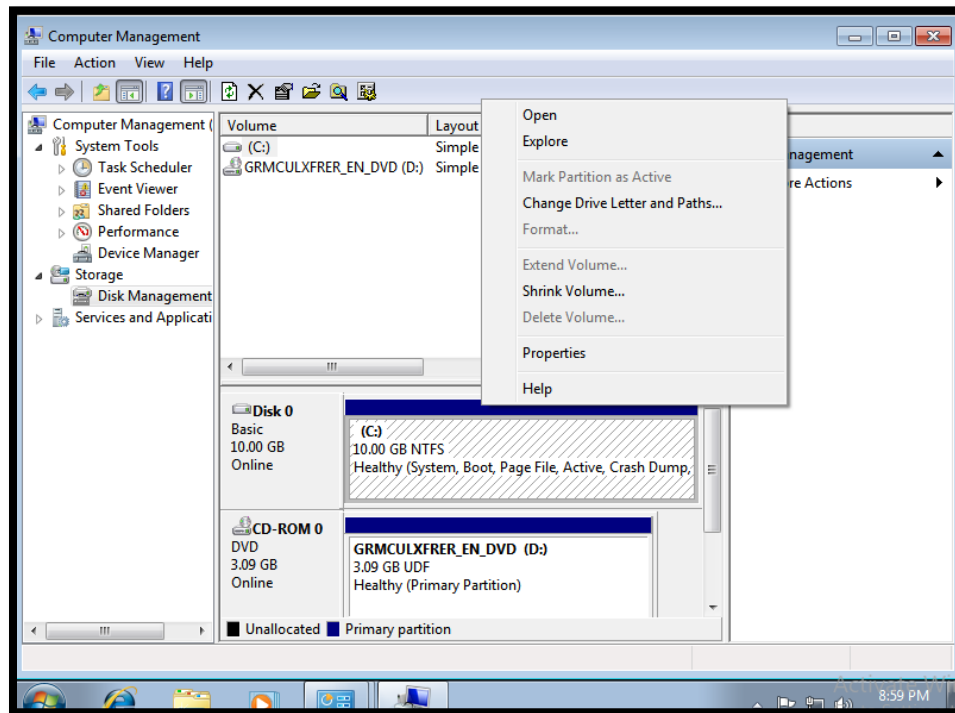

➤ Step 3: Now go to Administrative tools and then to Computer Management

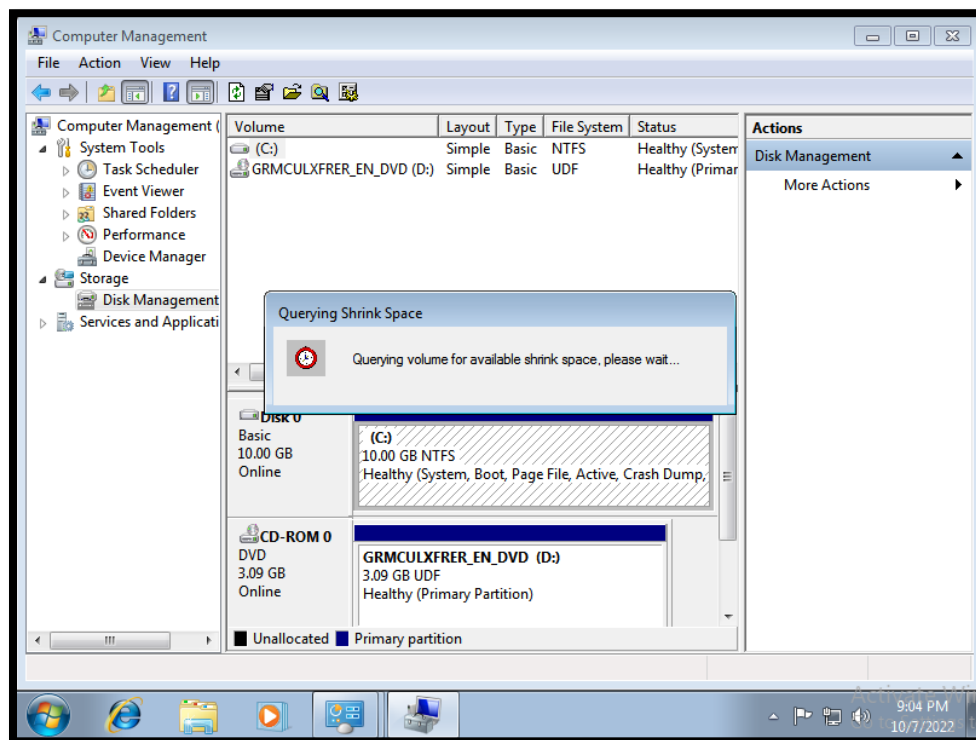

➤ Step 4: After that go to Storage and Disk Management

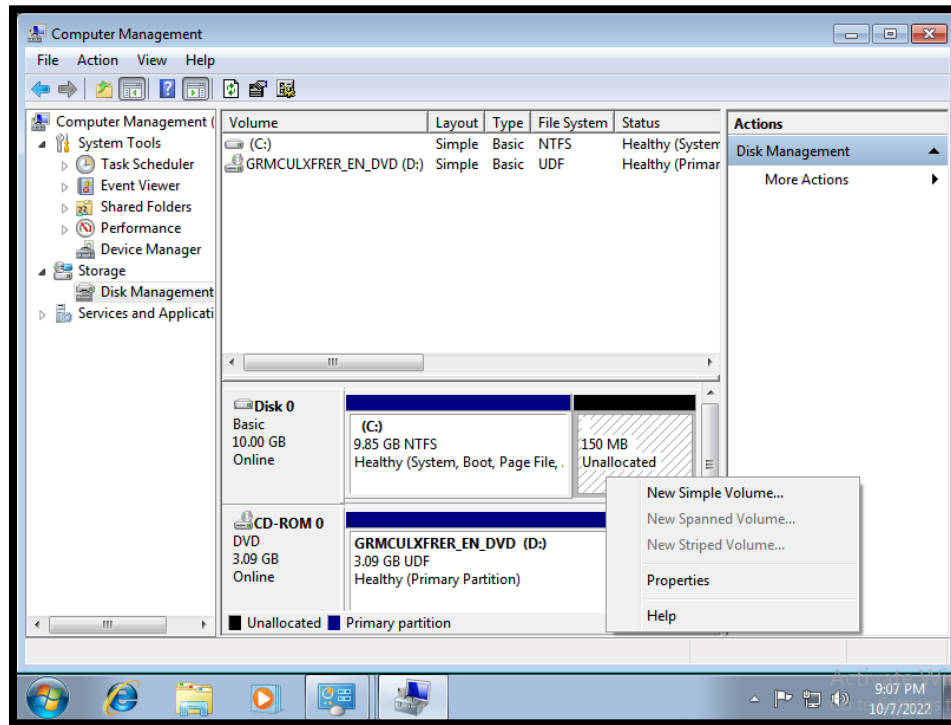

- Step 5: There is only C drive available. To make another drive we need to shrink C drive by selecting Shrink Volume.

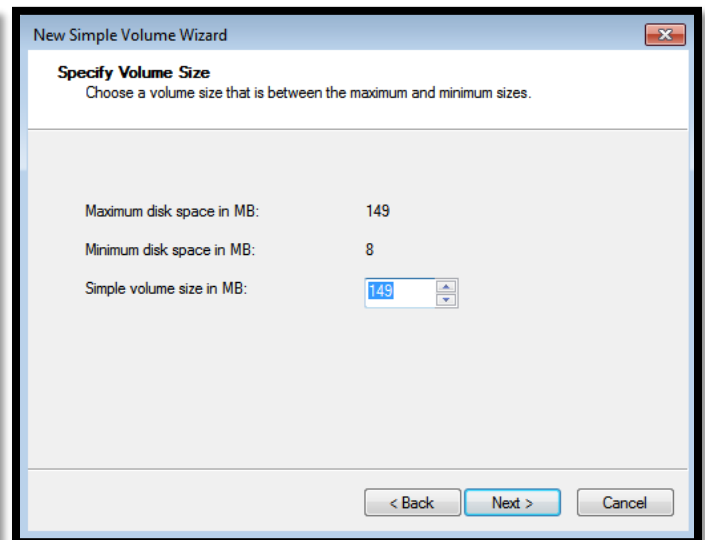

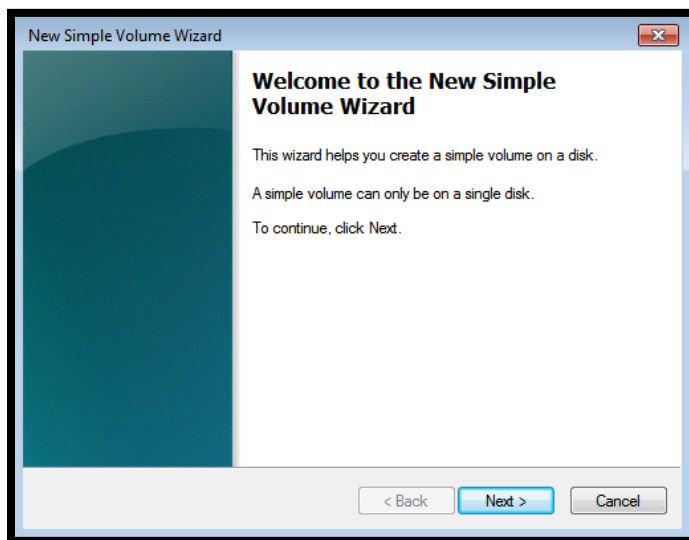

- Step 6: C drive is getting shrink.

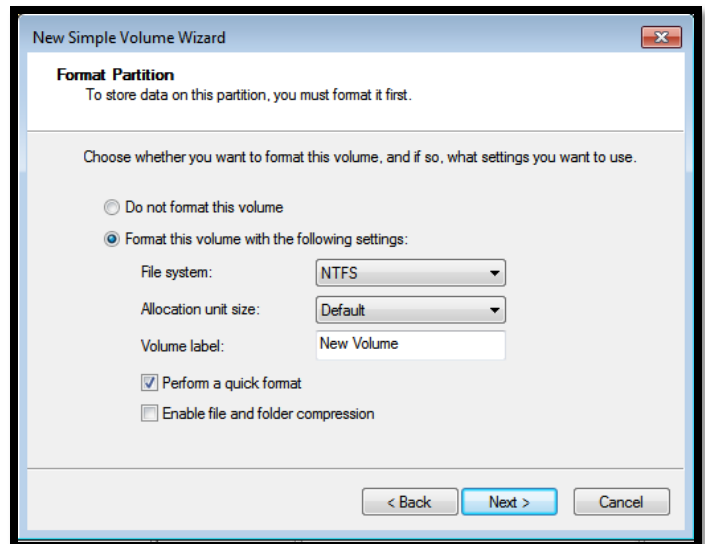

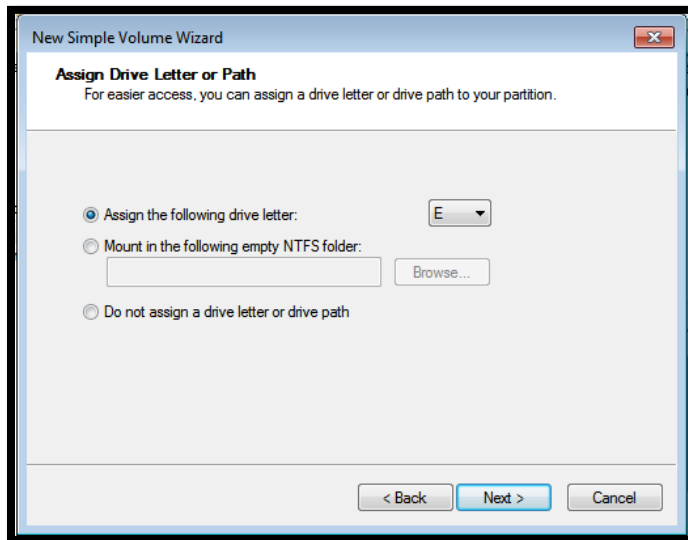

- Step 7: A new drive is formed with some allocated space.

- Step 8: We need to allocate space to new drive.

- Step 9: Select the name for your new drive.

- Step 10: The new drive named as E drive is created.
